

# HOËRSKOOL GRENSWAG

“Ons gee om” – “We care”

## 1 THE VISION OF GRENSWAG

Grenswag High School aims to present learners with an education that is value-driven, well-balanced and of high quality, and to prepare them to be responsible and proud citizens of South Africa.

## 2 THE MISSION OF GRENSWAG

- **Integrity**
- **Respect**
- **Loyalty**
- **Self-worth**

Educators will set the example so that the following values could be developed and protected on our school premises, in classrooms, on the sport field, in cultural activities as well as in our community.

To present learners with a balanced education, the focus will be on school work. Besides that, equal opportunities for development and achievements will be given in sport and cultural activities. Spiritual, physical and emotional care will be available to learners as well as educators.

Educators will present a professional conduct and appearance, will be well-prepared, present lessons, projects, tests and exam papers, and complete their extramural and administrative obligations punctually and with dedication. They will use extramural activities for the holistic development of the child. Values and life skills will be developed at Grenswag High School.

It will be expected of learners to take responsibility of their school work while self-discipline will be encouraged. Learners will be educated holistically through their extramural activities in values, like teamwork, perseverance, open-handedness, good sportsmanship, and how to handle the art of winning and losing.

A Christian ethos and biblical values will be maintained. The values of the constitution will be protected and included in the code of conduct. It will be based on the basic principle and life-line where everyone will accept responsibility of his/her own conduct, that his/her freedom and rights will be coupled with responsibilities due to allowance for the rights of others. By doing so, we will cultivate responsible citizens of this country.

**“ONS GEE OM” – “WE CARE” IS OUR PHILOSOPHY**
